COMBUSTION CONTROL ACCESSORIES TEMPERATURE INDICATORS (TI)

Thermometers offer a visual readout of preheated fuel oil temperature in combustion systems to ensure proper viscosity for pumping and/or atomizing.

The 5VBM4 Series is suitable for any preheated No. 4, No. 5, No. 6 or reclaimed fuel oil. The bi-metallic thermometers offer a variable viewing angle, 5" dial with black numbers on white background, and stainless steel stem. All thermometers are hermetically sealed and silicone dampened for optimum performance, and include a recalibration feature. Various Fahrenheit and Celsius ranges are available with 1% accuracy of scale range.

Model No.	Hauck Part No.	Range
5VBM4-0/200F	39626X001	0 - 200 °F
5VBM4-50/300F	39626X002	50 - 300 °F
5VBM4-0/100C	62799	0 - 100 °C
5VBM4-0/150C	39626X003	0 - 150 °C
5VBM4-0/200C	62800	0 - 200 °C
