certin@nmi.n
www.nmi.nl

NMi Certin B.V., designated and notified by the Netherlands to perform tasks with respect to conformity modules mentioned in article 9 of Directive 2004/22/EC, after having established that the Measuring instrument meets the applicable

Elster-Instromet B.V. Munstermanstraat 6 7064 KA Silvolde The Netherlands

A Rotary Displacement Gas Meter

Destined for the measurement of + : Gas volume
Accuracy class + Class 1,0 or 1,5
Environment classes $\quad$ M2/E2
Temperature range $\quad-25^{\circ} \mathrm{C} /+55^{\circ} \mathrm{C}$

Further properties are described in the annexes
Description T10198 revision 1
Documentation folder T10198-2
11 June 2019
folder

This document is issued under the provision that no liability is accepted and that the applicant shall indemnify third-party liability.

The designation of NMi Certin BV.as Notified
Body can be verified at http://
ec.europa.eu/enterprise/newapproach/nando/

Parties concerned can lodge objection against this decision, within six weeks after the date of submission, to the general manager of NMi (see www.nmi.nl).

Reproduction of the complete document only is permitted.

## Description

Number T10198 revision 2 Project number SO 11201020 Page 1 of 4

## 1 General information about the gas meter

All properties of the gas meter, whether mentioned or not, shall not be in conflict with the legislation.

### 1.1 Essential parts

Measuring part
The dimensions of the rotors are presented in the table below, while also the appertaining volumes are indicated.

| rotor heigth <br> $[\mathrm{mm}]$ | rotor thickness <br> $[\mathrm{mm}]$ | rotor length <br> $[\mathrm{mm}]$ | volume $(\mathrm{V})$ <br> $\left[\mathrm{dm}^{3}\right]$ |
| :---: | :---: | :---: | :---: |
| 110 | 50 | 76 | 0,795 |
| 110 | 50 | 116 | 1,212 |
| 110 | 50 | 138 | 1,443 |
| 170 | 78 | 138 | 3,469 |
| 170 | 78 | 176 | 4,424 |
| 170 | 78 | $110(2 x)$ | 5,530 |
| 170 | 78 | $176(2 x)$ | 8,849 |
| 170 | 78 | $282(2 x)$ | 14,18 |

Remark: The versions with rotor length ( 2 x ) concern duo versions.

### 1.1.1 Bearings of the rotors

The bearings of the rotors are presented in documentation number RE 4449.

### 1.2 Essential characteristics

The meter has the following characteristics:

| $\mathrm{Q}_{\text {max }}$ <br> [ $\mathrm{m}^{3} / \mathrm{h}$ ] | minimum $\mathrm{Q}_{\text {min }}$$\left[\mathrm{m}^{3} / \mathrm{h}\right]$ | $\left[\mathrm{m}^{3} / \mathrm{h}\right]$ | maximum $\mathrm{p}_{\text {max }}$ <br> [bar] | volume <br> V $\left[\mathrm{dm}^{3}\right]$ | diameter[mm] | accuracy class | Basic transfer relationship |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |  |  | number of revolutions |  |
| 25 | 0,3 | 2,5 | 16 | 0,795 | 40 or 50 | 1,0 | 126 | 0,1 |
| 40 | 0,3 | 4,0 | 16 | 0,795 | 40 or 50 | 1,0 | 126 | 0,1 |
| 65 | 0,3 | 6,5 | 16 | 0,795 | 40 or 50 | 1,0/1,5 | 126 | 0,1 |
| 100 | 0,3 | 10 | 16 | 0,795 | 40 or 50 | 1,0/1,5 | 126 | 0,1 |
| 65 | 0,3 | 6,5 | 16 | 1,212 | $\begin{gathered} 40 \text { or } 50 \\ \text { or } 80 \end{gathered}$ | 1,0/1,5 | 83 | 0,1 |
| 100 | 0,3 | 10 | 16 | 1,212 | $\begin{gathered} 40 \text { or } 50 \\ \text { or } 80 \end{gathered}$ | 1,0/1,5 | 83 | 0,1 |

## Description

| 160 | 1 | 16 | 16 | 3,469 | 80 or 100 | 1,0/1,5 | 288 | 1,0 |
| 250 | 1 | 25 | 16 | 3,469 | 80 or 100 | 1,0/1,5 | 288 | 1,0 |
| 400 | 1 | 40 | 16 | 3,469 | 80 or 100 | 1,0/1,5 | 288 | 1,0 |
| 160 | 1 | 16 | 16 | 4,424 | 80 or 100 | 1,0/1,5 | 226 | 1,0 |
| 250 |  | 25 | 16 | 4,424 | 80 or 100 | 1,0/1,5 | 226 | 1,0 |
| 400 |  | 40 | 16 | 4,424 | 80 or 100 | 1,0/1,5 | 226 | 1,0 |
| 400 |  | $40$ |  | 5,530 | $\begin{gathered} 100 \text { or } \\ 150 \end{gathered}$ | 1,0 | 181 | 1,0 |
| 650 |  | 65 |  | 5,530 | $\begin{gathered} 100 \text { or } \\ 150 \end{gathered}$ | 1,0 / 1,5 | 181 | 1,0 |
| 650 | 4 |  | 16 | 8,849 | $\begin{gathered} 100 \text { or } \\ 150 \end{gathered}$ | 1,0 / 1,5 | 113 | 1,0 |
| 1000 | 4 | 100 | 16 | 8,849 | $\begin{gathered} 100 \text { or } \\ 150 \\ \hline \end{gathered}$ | 1,0 / 1,5 | 113 | 1,0 |
| 1000 |  | 100 | 16 | 14,18 | $\begin{gathered} 150 \text { or } \\ 200 \end{gathered}$ | 1,0 | 710 | 1,0 |
| 1600 |  | 160 | 16 | 14,18 | $\begin{gathered} 150 \text { or } \\ 200 \end{gathered}$ | 1,0 / 1,5 | 710 | 10,0 |
| $1600$ | 10 | 160 | 16 | 14,18 | see drawing no. RE 4448B | 1,0 / 1,5 | 710 | 10,0 |

1.2.2 Flowrate range

The flowrate range shall fulfil the following conditions:

| Class | $\mathrm{Q}_{\max } / \mathrm{Q}_{\min }$ |
| :---: | :---: |
| 1,5 | $\geq 150$ |
| 1,0 | $\geq 20$ |

## Description

Number T10198 revision 2 Project number SO 11201020 Page 3 of 4

### 1.3 Essential shapes

1.3.1 The nameplate is bearing at least, good legible, the information as mentioned in the OIML R137-1. Examples of the markings are shown in the documents RE 4555, RE 4551 and RE 4552.
1.3.2 Sealing: see chapter 2.

### 1.4 Conditional parts

### 1.4.1 Construction

In addition to the essential parts as mentioned at 1.1, the meter contains at least the following conditional parts:

- housing;
- transmission;
- register;
- front and back cover;
- synchronization wheels
- pressure measuring points.

The meter can also be provided with low and high frequency impulse outputs respectively.

### 1.4.2 Housing

The gas meter has a housing, which has sufficient tensile strength.

### 1.4.3 Transmission

The transmission between the measuring part and the register is executed by means of a magnet coupling. The register is adjustable via adjustment wheels. An example of the gear transmission is presented in documentation number RE 4445 and RE 4446.

Register
The measured volume is presented by means of a mechanical register. Examples are stated in in documentation number RE 4445 (universal index) and RE 4446 (compact index). The universal index is executed double, with one of them blinded, so that only the counter which registers positively is visible.

The meter also can be equipped with Encoder registers as described in the documentation no's RE 4517, RE 4518 and RE 4559.

On behalf of the register a so-called pick and place construction can be used optionally, which simplifies exchange of the register (see drawing no. RE 4452). This pick and place construction is sealed, as indicated in chapter 2.
On behalf of the register an angle gearbox can be used optionally, to mount the register at another angle (see drawing RE 4451). This angle gear box is sealed, as indicated in chapter 2.

The register is built up as follows:

| size | number of drums |  | control-element [ $\mathrm{m}^{3}$ ] |
| :---: | :---: | :---: | :---: |
|  | before the comma | behind the comma |  |
| $40 \mathrm{t} / \mathrm{m} 100$ | 6 | 2 | 0,002 |
| $100 \mathrm{t} / \mathrm{m} 160 \mathrm{t} / \mathrm{m} 1000$ | 7 | 1 | 0,02 |
| 1600 | 8 | 0 | 0,2 |

### 1.4.5 Front and rear cover

The entrance to the transmission from the measuring part to the register is shielded by means of a front and a rear cover.
1.4.6 Synchronisation wheel

The rotors are coupled together mechanically by means of a synchronization wheel.

### 1.4.7 Pressure tappings

The housing contains a pressure tapping to determine the inlet pressure. This pressure tapping is provided with the indication " $p_{m}$ ". A second pressure tapping at the outlet is provided with the indication " p ".

### 1.5 Non-essential parts

1.5.1 Low frequency sensors and high frequency sensors
1.5.2 Oil filling plug, drain plug and sight glass for lubrication and checking oil level in the meter

### 1.5.3 Temperature points

## 2 Seals

The following items of the meter are sealed:
The entrance to the measuring part;
The entrance to the register;
the pick and place construction (if available), see example drawing RE 4452; the angle gearbox (if available), see example drawing RE 4451; the entrance to the drive shaft (if available) and appertaining markings; the impulse outputs (if available) as well as the appertaining marking for the impulse value.

See further Documentation no. RE 4447 for an example of the sealing of the complete meter.
