

Commercial/Industrial Combustion Product Overview

Pressure Limits and Controls

L404 Pressuretrol® Mercury Free Pressure Controls

- Provides operating control with automatic limit protection for pressure systems up to 300 psi, or oil burner systems up to 150 psi
- Used with steam, air, non-combustible gases, or fluids non-corrosive to the pressure sensing element
- Utilizes MICRO-SWITCH® snap acting switches
- Automatic and manual reset models available
- Mercury FREE!

P7810 Solid State Pressuretrol® Controllers Reliable Pressure Control and Safety

- Line voltage pressure controller for pressure systems up to 300 psi
- Provides automatic operating control, automatic limit protection, manual reset limit protection, and 4-20ma modulating firing rate control
