

ECLIPSE FR FILTERS

Multi-purpose filters for combustion equipment.

FR Filters are multi-purpose carbon fiber filters that can be used on liquid fuels such as light mineral oil, petroleum distillates and #2 fuel oil, as well as compressed air and gases not corrosive to brass. Rated for pressures up to 125 PSI, FR Filters are available for pipe train sizes of 1/4, 3/8 and 1/2 inch. Flow rates vary based on fluid viscosity. The carbon fiber filter elements are replaceable.

| Assembly Number | Pipe Connection | Height (mm) | Width (mm) | Length (mm) | Element Part Number |
|-----------------|-----------------|-------------|------------|-------------|---------------------|
| 500325 | 1/4 in. NPT | 80.3 | 39.6 | 73.1 | 17867 |
| 500326 | 3/8 in. NPT | 80.3 | 39.6 | 73.1 | 17867 |
| 500327 | 3/8 in. NPT | 112.7 | 47.6 | 85.7 | 17868 |
| 500328 | 1/2 in. NPT | 112.7 | 47.6 | 85.7 | 17868 |
