

# COMAX II LASER LEVEL GAUGE

## **Highly accurate glass level measurement system**

The Comax II Laser Level Gauge measures the level of reflective surfaces in applications where continuous, non-contacting, measurement is desired without the use of hazardous materials. Comax II measures glass levels to within 0.002".

### **Benefits**

- Save time and money with:
  - Virtually no maintenance
  - Excellent reliability
  - Non-contact operation
- Save money by reducing scrap with improved accuracy

### **Features**

- Scanner motor is the only moving part
- Automatic calibration
- Improved optics
- Easy alignment
- Stainless steel full envelope water cooling jackets
- Improved adjustable bases
- Temperature sensing in laser and receiver
- High and low level temperature alarms
- +/- .002" (+/- .05mm) accuracy
