

# HONEYWELL COMBUSTION SAFETY

## Gas Hazards Management

Honeywell Combustion Safety offers a portfolio of services to minimize risks related to industrial and utility customer flammable fuel piping systems.

### Facility Audits for Design, Physical Condition, and Work Practices

Our firm provides physical condition audits to screen for installation issues, maintenance practices, operational issues, Code compliance, design issues, and much more to enhance the safety of customer sites.

### Personnel Training for Safe Gas Handling and Work Practices

Honeywell Combustion Safety offers targeted training programs with measurable results. Our firm also provides internal subject matter experts to direct and participate in piping maintenance and/or purging operations.

### Corrosion Control Services

Corrosion control systems and their monitoring are required by Codes. Our firm conducts corrosion control surveys for underground and above ground piping systems.

### Purging Services

Our firm can supply field labor services for planning and executing pipeline commissioning activities. We define the scope of work, provide direction to contractors, determine pressure testing compliance requirements, and operate the site valves and systems to achieve the desired end results.

### Specialty Services

Honeywell Combustion Safety also provides a number of specialty services: underground and above ground gas leakage, gas purity analysis, site specific P & ID drawings, and advanced composite pipeline rehabilitation and repair.

## World Leader in Combustion Safety Services

With 30 years of industry experience, Honeywell Combustion Safety, formerly known as CEC Combustion Safety, is the world leader in managing and mitigating combustion equipment and fuel gas piping risk exposure. The company provides expert testing, inspection, training and engineering services for all types of fuel-fired systems across numerous industries throughout the world.

## National Code Committee Member

- NFPA 85 - Boilers greater than 12.5 MM BTU/HR
- NFPA 86 - Furnaces & Ovens
- NFPA 87 - Fluid Heaters
- NFPA 56 - Standard for fire & explosion prevention during cleaning & purging of flammable gas piping systems

## Facts and Figures

- Global service, engineering & upgrade capabilities
- Domain expertise with all types of fuel-fired systems across numerous industries
- 30,000+ fuel-fired systems inspected and safety tested
- SafeView - A unique online reporting system featuring a dashboard that trends and tracks issues, and empowers proactive decisions across one to 100+ facilities and thousands of fuel-fired systems
- Corporate-wide creation, implementation and management of safety programs
- Thousands trained annually with client-specific hazards, live-fire demos and online training
- Proven safety services to increase safety, reduce costs and increase reliability, efficiencies, and competitiveness while ensuring facility capacity
