

HONEYWELL COMBUSTION SAFETY

Customized Training

Honeywell Combustion Safety offers onsite, regional, and online training designed to provide long-term sustainable programs for maintaining the safe, reliable, and efficient operation of your fuel-fired equipment.

Course Content

Training content is customizable to your site(s), facility and equipment. Programs can be delivered on-site, online, at our headquarters or at various locations throughout the U.S. each year. Select your own content or choose from over 20 of our pre-packaged modules.

Combustion University - On-Line Training

Combustion University is a great way to receive training at your convenience, without having to travel further than your computer. Certificates of completion and continuing education units are available. Accessible 24-hours per day, 365 days per year.

Courses and Participant Knowledge Assessments

Honeywell Combustion Safety offers an industry-exclusive Combustion IQ Knowledge Assessment to identify what knowledge gaps exist among your personnel, as well as knowledge gained throughout the course(s).

Hands-on and Live-Fire Demonstrations

The benefits of simulated learning in a controlled environment are unsurpassed. Our live-fire demonstrations allow participants to learn through application and bring that knowledge back to their work site(s).

Benefits

Training courses are designed to dramatically reduce the risk of combustion system accidents, enhance safety efforts and cut costs by minimizing the need for outside contractors by providing personnel with the ability to diagnose and repair problems faster, reduce interruptions and outages, and better protect your personnel and equipment.

World Leader in Combustion Safety Services

With 30 years of industry experience, Honeywell Combustion Safety, formerly known as CEC Combustion Safety, is the world leader in managing and mitigating combustion equipment and fuel gas piping risk exposure. The company provides expert testing, inspection, training and engineering services for all types of fuel-fired systems across numerous industries throughout the world.

National Code Committee Member

- NFPA 85 - Boilers greater than 12.5 MM BTU/HR
- NFPA 86 - Furnaces & Ovens
- NFPA 87 - Fluid Heaters
- NFPA 56 - Standard for fire & explosion prevention during cleaning & purging of flammable gas piping systems

Facts and Figures

- Global service, engineering & upgrade capabilities
- Domain expertise with all types of fuel-fired systems across numerous industries
- 30,000+ fuel-fired systems inspected and safety tested
- SafeView - A unique online reporting system featuring a dashboard that trends and tracks issues, and empowers proactive decisions across one to 100+ facilities and thousands of fuel-fired systems
- Corporate-wide creation, implementation and management of safety programs
- Thousands trained annually with client-specific hazards, live-fire demos and online training
- Proven safety services to increase safety, reduce costs and increase reliability, efficiencies, and competitiveness while ensuring facility capacity
