Re: Persistent Organic Pollutants EU 2019/1021

In response to your recent enquiry I am pleased to inform you that, to the best of our belief, none of the persistent organic pollutants listed in Annex I of Regulation EU 2019/1021 are present in any of our products.

No listed persistent organic pollutants are specified, nor could they reasonably be expected to be present in our materials. Since we do not expect any of these materials to be present, we do not specifically run any formal analysis of our products.

This statement does not apply to possible unintentional detectable trace elements.

Sincerely,

Martyn Rowe
